## Cleaning and care

For more useful information regarding our care products, please go to our website [www.terhuerne.de/cleaning](http://www.terhuerne.de/cleaning)

Your local ter Hürne dealer will be happy to advise you.

### Maximum surface protection

The LVT floors Pro, Compact and Comfort are suitable for all areas which are subject to heavy soiling and therefore require to be damp cleaned (i.e. kitchens).

Our solid vinyl floors Pro and Compact handle water very well, as it is the nature of the material not to be able to absorb water, so they are also suitable for use in bathrooms.

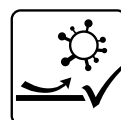

### Guaranteed quality

LVT by ter Hürne is not only extremely simple to care for, but it is also hygienic with antibacterial qualities. To clean your floor, only use the special ter Hürne cleaning products, which are available from your local stockist.

Please follow the care instructions and information provided. We then guarantee you an especially long life for your floor.

**ROBUST**

**ANTIBACTERIAL**

### Get the best from your floor for longer

- Create a healthy room climate with 40 - 60% relative humidity and a temperature of around 20 degrees.
- Protect your floor by placing protective mats in the entrance to the room in order to collect large particles of dirt immediately and stop them coming into contact with your floor at all.
- Place felt gliders underneath moveable furniture. Only use soft castors (EN 12529 Type W).
- Protect your floor by avoiding high point loads (i.e. high heels) and scratches (i.e. pet claws).
- If a warm water underfloor heating system is installed, the surface temperature must not exceed 27 degrees.
- Only use a brush, vacuum cleaner or moist, wrung-out cloth for cleaning. Do not use steam cleaner (212°F, 100°C). Avoid leaving water standing on the floor.
- Do not use any oil or wax during cleaning.

### Regular mopping – permanent cleanliness maintains value

Remove stubborn dirt, which can adhere to the floor during normal daily use with regular cleaning using the ter Hürne Cleaner concentrate - Luxury Vinyl Tiles.

**Application:** First remove loose dirt with a brush/vacuum cleaner. Depending on how dirty the floor is, mix 20 - 50 ml cleaner concentrate in 8 ltrs of water. Wipe the floor with a moist, well wrung-out cloth only. Always wipe along the planks lengthways. Do not use microfibre cloths. Do not rinse off with water.

**Cleaner concentrate - Luxury Vinyl Tiles**

Article no. 1101060135

Content 1000 ml

### Intensive cleaning – cleaning and protection for maximum resistance

Care product residues, old polish and wax residues such as oil and grease marks can be removed with the ter Hürne Intensive cleaner.

**Application:** Depending on the age and thickness of the residues, the intensive cleaner should be diluted in hot water from 1:1 to 1:10. Using light pressure mop evenly along the direction of the planks. If necessary repeat the procedure. Leave on for 5 - 15 minutes. Remove the loosened dirt and rinse off with water. Warning slippery surface!

Work on large areas in stages. In case of extremely heavy soiling a cleaning professional should attend.

**Note:** If in doubt please test the product on a spot that is not visible.
